WORK EXPERIENCE

● **Research Scientist & Agentic-AI Specialist (as external collaborator at Unlimidata)**

01/10/2024 - Current

The development projects with Unlimidata involve research on LLMs and other AI techniques (Symbolic and Sub-Symbolic) to ensure Data Curation. My focus is about Retrieval-Augmented Generation and Agentic AI in a Neuro-Symbolic context.

The procedure of becoming a full member at Unlimidata is currently under discussion.

EDUCATION & TRAINING

● **02/01/2025 - CURRENT** Vienna

● **PhD - BilAI project** TU Wien

01/10/2022 - 17/09/2024 Rende, Italy

● **Master's Degree in Computer Engineering (AI & Machine Learning)** Università della Calabria

Theoretical Computer Science, Big Data Analysis, Optimization, Data Mining, Multi-Agent Programming, Artificial Intelligence, Computer Vision, Information Retrieval, Natural Language Processing, Machine Learning, Deep Learning, Knowledge Representation, Social Media Analysis

Final grade: 110 e lode | **Thesis:** Integrating Trustworthiness and Fairness

Properties in a Multi-Aspect Agent-Based Retrieval-Augmented Generation System

01/10/2019 - 15/09/2022 Rende, Italy

● **Bachelor's Degree in Computer Engineering** Università della Calabria

Logic Networks, Agent Oriented Programming, Fundamentals of Automatic Control, Operating Systems and Parallel Programming, Algorithms and Data Structures, Digital Electronics, Telecommunication Networks, Databases, Computer Networks, Software Engineering

Final grade: 110 e lode

PUBLICATIONS

2026

● **GaV: Guess and Verification of Column Semantics**

Authors: Davide Di Stefano (TU Wien & Unlimidata Ltd), Jinsong Guo* (Unlimidata Ltd), Yang Hu (University of Leicester), Matteo Capalbo (University of Calabria), Davide Mario Longo (University of Calabria), Georg Gottlob (University of Calabria) | **Journal Name:** IEEE ICDE 2026

SKILLS

Agentic AI techniques: RAG, Advanced Prompting, Agent Planning | LLM orchestration frameworks: LangChain, LangGraph | Distributed computing frameworks: Storm, Spark | Machine learning frameworks: Pytorch, Tensorflow, Keras | Data mining: Rule discovery algorithms | Artificial intelligence: Machine Learning, Deep Learning | Programming languages:

PROJECTS

● Rule2Code

Rule2Code is a multi-agent architecture for translating natural language rules into a selected language. It is already been deployed in collaboration with Bank of Italy, using a Rule2Vadalog eco-system to run data quality checking rules over millions rows of databases.

LANGUAGE SKILLS

MOTHER TONGUE(S): Italian

OTHER LANGUAGE(S):

English

Listening B2	Spoken production B2
Reading B2	Spoken interaction B2
Writing B2	

German

Listening A1	Spoken production A1
Reading A1	Spoken interaction A1
Writing A1	

HONOURS AND AWARDS

● **25/03/2024** [Università della Calabria](#)

● 5x1000 Unical Funds Award

Award given to university students who have distinguished themselves for their commitment to studies in the 2022/23 academic year thanks to the 5x1000 funds allocated to the University of Calabria. Same prize is reached for the 2023/24 academic year.

COMMUNICATION AND INTERPERSONAL SKILLS

● Working and collaboration in a group

Skill acquired while carrying out group projects at university and developing projects inside Unlimidata.

● Empathize and listen

Understanding people's emotional state, problems and strengths allows me to help them bring out the best in themselves.
